

ARCTIC TRACE ®

Plumbing Vent Freeze Protection Application

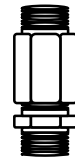

Arctic Trace installed in vent for freeze protection using galvanized iron vent hanger.

Note: The preassembled heater bundle is manufactured with heater model Z120512CBTL and includes a Polyolefin outer jacket. The heater is installed through the vent outlet and held in place with the # 675C metal hanger and SS hose clamp. The hanger has a hole for mounting a Junction box 208C in combination with the 207C junction box or conduit adapter. Heater surface Temperature will not exceed 150F.

Galvanized Vent hanger with SS hose clamp and locating pins. For use on plastic or metal vent pipe from 3 to 6".

- 3" Pipe # 675C3
- 4" Pipe # 675C4
- 6" Pipe # 675C6

207C 1/2 x 1/2" water proof MNPT junction box or conduit union adapter

Yellow Jacket Series 80 Vent Heater

Arctic Trace factory assembled 4' heater bundle inside vent pipe.

- o Z120512CBTL submersible heat trace
- o 20 watts per foot at 120 VAC (80 Watts)
- o 24" cold lead for power connection
- o Polyolefin outer jacket
- o Factory assembled, tested and labeled
- o Weight 3 1/2 Lbs.
